LINUX

Foydalanuvchilar, guruhlar va fayl huquqlari

Amaliy mashg‘ulot • 3 ta mustaqil vazifa

Qisqa eslatma

r = read	w = write	x = execute
4	**2**	**1**

1-raqam	2-raqam	3-raqam
Egasi (owner)	Guruh (group)	Boshqalar (others)

Maqsad: user/group yaratish, chmod va chown bilan amaliy ishlash, r/w/x huquqlarini tekshirish.

1-VAZIFA

Asosiy foydalanuvchi va papka huquqlari • Daraja: Oddiy

Topshiriq

1. student1 va teacher1 foydalanuvchilarini yarating.
2. students va teachers guruhlarini yarating.
3. student1 ni students guruhiga qo‘shing.
4. teacher1 ni teachers guruhiga qo‘shing.

```
groups student1
groups teacher1
ls -ld /school/students /school/teachers
```

2-VAZIFA

Maktab papkalari va guruhlar bilan ishlash • Daraja: O‘rtacha

Yaratiladigan struktura

```
/school
├── library
├── teachers
└── students
```

1. ali, vali, sardor foydalanuvchilarini yarating.
2. teachers va students guruhlarini yarating.
3. ali → teachers guruhiga qo‘shilsin.
4. vali va sardor → students guruhiga qo‘shilsin.
5. /school/library egasi vali:students bo‘lsin.
6. /school/teachers egasi ali:teachers bo‘lsin.
7. /school/students egasi sardor:students bo‘lsin.
8. library uchun 750 huquq bering.
9. teachers uchun 750 huquq bering.
10. students uchun: egasi rwx, guruhi r-x, boshqalar --- bo‘ladigan raqamli huquqni o‘zingiz aniqlab o‘rnating.
11. vali foydalanuvchisining parolini o‘zgartiring.
12. groups ali, groups vali, groups sardor orqali natijani tekshiring.

3-VAZIFA

Academy uchun ruxsatlar tizimi • Daraja: Qiyinroq

Yaratiladigan struktura

```
/academy
├── admin
├── lessons
└── shared
```

Foydalanuvchilar va guruhlar

```
aziz    → teachers
bekzod  → students
nodir   → students
```

Topshiriq

1. aziz → teachers guruhida bo‘lsin.
2. bekzod va nodir → students guruhida bo‘lsin.
3. Keyinchalik aziz ni students guruhiga ham qo‘shing.
4. /academy/admin papkasining egasi aziz:teachers bo‘lsin.
5. /academy/lessons papkasining egasi aziz:teachers bo‘lsin.
6. /academy/shared papkasining egasi bekzod:students bo‘lsin.
7. admin papkasi: egasi to‘liq huquq, guruhi faqat o‘qish va kirish, boshqalar hech qanday huquqqa ega bo‘lmasin.
8. lessons papkasiga 750 huquq bering.
9. shared papkasi: egasi rwx, guruhi rwx, boshqalar r-x bo‘lsin. Raqamli huquqni o‘zingiz aniqlang.
10. su - aziz, su - bekzod, su - nodir orqali har bir foydalanuvchini tekshiring.
11. Har bir foydalanuvchi qaysi papkaga kira olishi va qaysisiga kira olmasligini amalda ko‘rsating.
12. Oxirida guruhlar va /academy huquqlarini tekshiring.

Yakuniy tekshiruv

```
groups aziz
groups bekzod
groups nodir

ls -l /academy
```

TOPSHIRISH TALABI

O‘quvchi ishlatgan komandalarini va yakuniy ls -l / ls -ld natijalarini ko‘rsatishi kerak. Vazifani faqat tayyor javobni ko‘chirib emas, terminalda amalda bajarib topshiring.
